

Project Overview

As of April 22, 2013

Ridge Street Improvements

Description and Benefits:

This collaboration between the cities of Columbus and Grandview Heights will reconstruct approximately 300 feet of Ridge Street between Waterman Avenue and the alley off Dublin Road and east of Grandview Avenue. The project will improve driving conditions, create on-street parking and add pedestrian facilities.

Improvements include:

- Reconstructing two, 10-foot travel lanes with asphalt and building 8-foot parking lanes made of pervious concrete on both sides
- Building new curbs and *Americans with Disabilities Act*-compliant curb ramps on both sides and a sidewalk on the south side
- Constructing a new closed storm sewer system
- Upgrading signage

Schedule:

Design: February – December 2013

Construction: Spring 2014, subject to funding approval

Cost:

Estimated \$400,000, including design, utility relocation, right-of-way acquisition, materials and construction. Grandview Heights will fund design and right-of-way acquisition. Columbus will fund construction.

Contact Information:

City of Columbus Design Project Manager Jamie Gordon, P.E., tel. 645-6068

Designer: E.P. Ferris & Associates

Construction Contractor: TBD
